## **Summer is just around the corner: Are your systems ready?**

With the weather growing ever slightly warmer, and snow being replaced by rain, it's time to think about getting your cooling systems ready! Metro can help you with all aspects of bringing your system up to speed and into compliance with various legal regulations and recommended guidelines, including OSHA regulations and *Legionella sp.* control.

For more information on how we can help, visit our Products & Services-Water Hygiene pages.

These pages contain valuable information about the programs we offer, plus links to resources addressing environmental cleaning and sanitation for national drinking water standards, New York City environmental and occupational disease, and OSHA regulations, including those addressing *Legionella sp.*

If there's information you're looking for that is not included in these pages, send us an email or give us a call, and we'll be happy to help!
